Occupied Palestinian Territory Gaza Emergency 2014: Damaged Houses (as of 28 Aug. 2014) OCHA The escalation of hostilities between 7 July and 26 August 2014 destroyed or severely damaged around 18,000 housing units, rendering an estimated 5 per cent of the housing stock uninhabitable and leaving approximately 100,000 people homeless. This is in addition to the Erez pre-crisis housing deficit of 71,000 housing units, due Beit Lahi to people living in overcrowded or inadequate Jabalya conditions. The provision of temporary housing solutions to these people is one of the major challenges facing the local authorities and the humanitarian community in the coming period.
