

REPORTED IMPACT SNAPSHOT | GAZA STRIP

12 August 2026 at 15:00

Disclaimer: Figures that are yet-to-be verified by the UN are attributed to their source. Casualty numbers have been provided by the Ministry of Health (MoH) and the Israeli authorities. The fatality breakdowns currently cited are those that the MoH in Gaza has fully identified as of 31 December 2025 out of the higher number of casualties they report. The latest casualty updates are also available on the Health Cluster's [Unified Dashboard](#).

REPORTED CASUALTIES (Cumulative) as of 12 August 2026

Palestinians*

Israelis**

PROTECTION

WATER SANITATION AND HYGIENE*

- 90% of assessed households faced moderate to high levels of water insecurity in the 30 days prior to early July.
- 37% of assessed households had total water access below minimum humanitarian standards (15L/person/day), including 66% below minimum for drinking water (6L/person/day).
- 87% of assessed households reported facing challenges in accessing safe and clean sanitation facilities.
- 26% of assessed households reported solid waste accumulation in their vicinity, and 43% observed sewage/sludge near their shelters.
- 65% of assessed households reported cases of skin diseases in the 30 days prior to early July.
- 85% of assessed households reported availability of soap at their shelters.
