- This report reflects information available as of the time of publication. The most updated data and more breakdowns are available at ochaapt.org/data.
- In Israel, three Israelis were killed by Palestinians in attacks that also resulted in the killing of one Palestinian (January – December 2025), and a Palestinian was killed in an attack by Israelis in West Jerusalem in May 2025. These are counted separately, as this report covers incidents that took place in the West Bank.
- Casualties in the West Bank have been documented by OCHA since 2005, settler violence since 2006, and demolitions and displacement since 2009.
- Palestinians or Israelis whose immediate cause of death or the perpetrator's identity remain disputed, unclear, or unknown, are counted separately, so are casualties as a result of "friendly fire" and Palestinian prisoners from the West Bank who have died in Israeli custody. Figures also do not include UXOs, mishandling of weapons, hit-and-run incidents, internal Palestinian clashes, and incidents where the perpetrator's nationality is disputed.
