\*Disclaimer:

1. This report reflects information available as of the time of publication. The most updated data and more breakdowns are available at [ochaapt.org/data](https://ochaapt.org/data).
2. In Israel, 14 Israelis were killed by Palestinians in attacks that also resulted in the killing of 6 Palestinians (January 2024 - July 2025); and a Palestinian was killed in an attack by Israelis in West Jerusalem in May 2025. These are counted separately, as this report covers incidents that took place in the West Bank.
3. Casualties in the West Bank have been documented by OCHA since 2005, settler violence since 2006, and demolitions and displacement since 2009.
4. Palestinians or Israelis whose immediate cause of death or the perpetrator's identity remain disputed, unclear, or unknown, are counted separately, so are casualties as a result of "friendly fire" and Palestinian prisoners from the West Bank who have died in Israeli custody. Figures also do not include UXOs, mishandling of weapons, hit-and-run incidents, internal Palestinian clashes, and incidents where the perpetrator's nationality is disputed.

## PROPERTY DAMAGE AND DISPLACEMENT

### Palestinian homes and other structures

Demolished, seized or sealed\*\*\*

### People displaced

■ Due to lack-of-permit, punitive and other demolitions

■ Due to the destruction of homes in Israeli forces' operations

■ Due to settler violence and access restrictions

*\*\*Charts in this section largely do not include property destruction within the context of operations between January and July 2025; this information will be added in the future once related assessments can be carried out, should security and access conditions permit. The situation in the northern West Bank remains fluid and numbers may be adjusted as new information becomes available.*

\*\*\*Structures demolished due to the lack of Israeli-issued building permits and on punitive or other grounds. These include structures that owners were forced to demolish following the receipt of demolition orders by the Israeli authorities.

\*\*\* Since January 2025, UNRWA has monitored the displacement of Palestine refugees from refugee camps in the northern West Bank through frontline staff and existing hostfamilies, initially estimating that about 40,000 Palestine refugees have been displaced from Jenin, Tulikarm and Nur Shams refugee camps and their immediate surroundings. In late March 2025, UNRWA launched an SMS-based self-registration survey to formalize and streamline data collection, allowing refugees to report household details, displacement locations, vulnerabilities and basic needs, which was cross-checked through a verification process that was carried out in stages in April and July 2025. As of the end of July, UNRWA-verified displacement figures, based on self-registration of displaced families, indicates that at least 32,590 Palestine refugees have been displaced from the three refugee camps. Verification of the number of displaced people is ongoing and will be updated by UNRWA if new information becomes available.
