4. Figures also do not include UXOs, mishandling of weapons, hit-and-run incidents, internal Palestinian clashes, and incidents where the perpetrator's nationality is disputed.

**** Since January 2025, UNRWA has monitored the displacement of Palestine refugees from refugee camps in the northern West Bank through frontline staff and existing hotlines, initially estimating that about 40,000 Palestine refugees have been displaced from Jenin, Tulkarm and Nur Shams refugee camps and their immediate surroundings. In late March 2025, UNRWA launched an SMS-based self-registration survey to formalize and streamline data collection, allowing refugees to report household details, displacement locations, vulnerabilities and basic needs, which was cross-checked through a verification process that was carried out in stages between April and 10 September 2025. As of 10 September, UNRWA-verified displacement figures, based on self-registration of displaced families, indicates that at least 31,919 Palestine refugees have been displaced from the three refugee camps. Verification of the number of displaced people is ongoing and will be updated by UNRWA if new information becomes available.
