

The Gaza Strip faces an unprecedented humanitarian crisis, impacting the livelihoods and access to essential services by its two million residents. This crisis has been driven by over 12 years of an Israeli blockade and an unsolved internal Palestinian divide, exacerbated since March 2018 by the massive increase in Palestinian casualties in the context of demonstrations taking place near Israel's perimeter fence, as well as limited escalations in hostilities between Israel and Palestinian armed groups. The following indicators were identified by the Humanitarian Country Team (HCT) to monitor specific aspects of the the crisis, trigger humanitarian action and prevent further deterioration.
