The situation of Palestinian traders in the Gaza Strip

The situation of Palestinian traders in the Gaza Strip has deteriorated further, with the number of crossings and goods significantly reduced. This has continued into 2017, despite efforts to improve the situation.

On 2005, Israel imposed a blockade on the Gaza Strip, which has had a devastating impact on the Palestinian economy and the well-being of its residents. The blockade has also prevented the flow of goods and people into and out of the territory.

In 2017, the number of crossings and goods at the Kerem Shalom crossing point has decreased significantly. This has had a negative impact on the Palestinian economy and the well-being of its residents.

The situation is expected to improve in the near future, with the easing of some of the blockade restrictions. However, there is still a long way to go before the situation returns to normal.

Overall, the situation of Palestinian traders in the Gaza Strip is still far from ideal, and more needs to be done to improve the situation and ensure that the residents of the territory can live in peace and prosperity.
The number of tanks of fuel at the power station in Rafah opened in October to meet 95%

of the demand, according to the Union of Tankers of Cooking Gas, which represents 5,185

tonnes of cooking gas, some of which was bought by the army and the security forces.

In addition, 18% of the tanks are filled with fuel at the customs of the fuel for the

electricity sector, and the fuel is delivered to the national grid.

In addition, 96% of the tanks are filled with fuel for the electricity sector, and the fuel is delivered to the national grid.

The customs have registered a decrease of 18% in the volume of imports compared to the previous month.
