The map displays the density of damage in Gaza based on satellite imagery dated October 31st. The map does not include a count of damaged buildings, and further has not been validated by assessment on the ground. The density map focuses on the Gaza Strip, with damage density shown as a heat map. Important to note when comparing damage density from different dates.

Data sources:
- Damage affected areas: IMPACT / UNOSAT
- Locality boundaries: REACH MSNA 2022
- Evacuation line: LiveUA
- Satellite imagery: WorldView-3 from 31 October 2023 and 10 May 2023
