

Occupied Palestinian Territory: Gaza emergency

Humanitarian Snapshot (as of 15 July 2014)

Geographic breakdown of fatalities

(8th to end of 15th of July)

Situation Overview

Tens of thousands of Palestinians from northern and central Gaza have fled their homes, following warnings from the Israeli military, with more than 18,000 individuals taking shelter in 21 UNRWA schools. In addition, 8,200 people have been displaced following the destruction or the damage to their homes.

Damage to health, education, water and sanitation facilities, and electricity infrastructure make it increasingly difficult to provide even the most basic services for the civilian population, with hundreds of thousands of Gazans without water.
